

### **Other Activities of ESPA Unit**

The Energy System Planning and Analysis Unit (ESPAU) provided service to the Alternative Energy Promotion Centre/Ministry of Environment/Government of Nepal for Study on Revision of Subsidy Policy on Renewable Energy Technology. The recommendations made by the study have been accepted by the Government and regulated. This study was based on development of subsidy model as dynamic tools.

The Energy System Planning and Analysis Unit (ESPAU) provided consulting services to the Carbon and Climate Unit (CCU) of the National Renewable and Rural Energy Project (NRREP) on Study on Role of Renewable Energy Technologies in Climate Change Mitigation and Adaptation Options in Nepal.

The ESPAU is also involved in the development of Water resources and Energy Sector Vision 2050 for the Water and Energy Commission Secretariat, Government of Nepal.

The ESPAU also presented future power requirement scenarios at the Power Summit 2013 organized by the Independent Power Producers of Nepal, Kathmandu, Nepal, 26 -27 August, 2013.
